**Narrative:**

The purpose of this survey was to establish the exterior corners of and mark the exterior lines of the ownership of the George Hemmings, Jr. in the Plat of City of Groves Harbor, South Side. This survey occupies the street and block solutions published by R.T. Sterling, F.S. in survey recorded in Block 23 of Survey of Page 104, Records of Groves Harbor County, Washington. The survey includes the following information for the placement of said plat. However, there is a question as to where exactly the east line of said plat should be placed.

The original plat of City of Groves Harbor, South Side, attached Government Lots 1 and 2 and the South Half of the Southwest Quarter of Section 28, Government Lots 3 and 4, were patented under three different patents, of dated 7-13-1855, Government Lots 3 and 4, were patented under Patent dated 5-30-1856, as such, the plat occupied the entire parcel in Section 28.

Reference surveys 4 and 5 are the only modern surveys recorded in the plat and neither take the original plat as a basis. The original plat is the only one that shows the true location of the north-south centerline of Section 28. The original plat is the only one that shows the true location of the north-south centerline of Section 28. The original plat is the only one that shows the true location of the north-south centerline of Section 28.

NOTE: None of the streets, alleys or blocks in the plat were computed by proportion because the original plat does not contain sufficient dimensions for the blocks closing to the perimeter of the plat to be able to perform the calculation.
